

ComSIA-2027 International Conference on Computing Systems and Intelligent Applications

Organized by School of Open Learning, University of Delhi & Shaheed Rajguru
College of Applied Sciences for Women, University of Delhi
5-6th March 2027.

***** CALL FOR PAPERS *****

SPECIAL SESSION ON

Trustworthy Artificial Intelligence and Intelligent Computing for Next-Generation Smart Systems

SESSION ORGANIZERS:

[Name, University or Organization, Country, e-mail]

Dr. Manvi Breja, The Northcap University, Gurugram, India, manvibreja@ncuindia.edu

Dr. Keshav Kaushik, Sharda University Noida, India, keshav.kaushik@sharda.ac.in

EDITORIAL BOARD: (Optional)

NIL

SESSION DESCRIPTION:

The development, deployment, and integration of intelligent systems in various application areas such as healthcare, smart cities, manufacturing, transportation, agriculture, education, finance, and cyber-physical systems is being revolutionized by Artificial Intelligence (AI). The intelligent computing system has advanced considerably over the last few years with the introduction of some new technologies like foundation models, machine learning, deep learning, multimodal AI, autonomous intelligent systems, edge intelligence, and distributed computing. With the rise of AI-driven technologies, however, concerns about trustworthiness, transparency, explainability, fairness, privacy and security have become critical, as have concerns about robust technologies, accountability, and governance.

Next generation smart systems success is not only about their intelligence but also on their reliability, ethics, security and responsibility features when deployed in dynamic real world environments. Resilient and human-centric intelligent systems are consequently becoming essential for the development of such systems that inspire user confidence, while respecting ethical and regulatory standards, and trustworthy-AI is a key element of these systems.

The purpose of this special session is to exchange the latest research developments, new trends and novel solutions on the challenges of trustworthy AI and intelligent computing involving researchers, academicians, industry practitioners and policy makers. The session will serve as a forum for sharing novel algorithms, architectures, methodologies, frameworks, and applications that tackle the challenges of developing secure, explainable, scalable and reliable AI-enabled systems. Papers related

to intelligent computing paradigms such as cloud-edge intelligence, distributed AI, cyber-physical systems, Internet of Things (IoT), intelligent automation and data-driven decision-making are invited in particular.

The session is open to both theoretical and practical research, highlighting the effective application of these principles of trustworthy AI in future smart systems in diverse fields. It also aims at building interdisciplinary cooperation between academia and industry to develop innovative AI solutions that are technically sound, socially responsible and able to solve complex real-world problems.

RECOMMENDED TOPICS:

Topics to be discussed in this special session include (but are not limited to) the following:

Trustworthy Artificial Intelligence

- Explainable and Interpretable AI (XAI)
- Responsible and Ethical AI
- Fairness, Bias Detection, and Mitigation
- Human-Centered AI

Intelligent Computing

- Machine Learning and Deep Learning
- Foundation Models and Multimodal AI
- Intelligent Data Analytics
- Distributed and Federated Learning
- Edge, Fog, and Cloud Computing

Intelligent Systems and Smart Applications

- Smart Cities and Urban Intelligence
- Intelligent Transportation Systems
- Smart Healthcare and Medical Informatics
- Smart Manufacturing and Industry 5.0
- Smart Education and Learning Technologies
- Intelligent Financial Systems
- Smart Governance and Digital Public Services

Secure and Reliable AI Systems

- AI Security and Adversarial Learning
- Privacy-Preserving Machine Learning
- Secure Federated Learning
- Blockchain for Trustworthy AI
- Cybersecurity for Intelligent Systems

Intelligent Automation and Decision Support

- Autonomous Intelligent Systems
- Multi-Agent and Distributed Intelligent Systems
- Intelligent Robotics
- Decision Support Systems
- Digital Twins and Cyber-Physical Systems
- Knowledge Graphs and Semantic Intelligence

Emerging AI Technologies

- Generative AI Applications
- AI Agents and Autonomous Workflows
- Retrieval-Augmented Intelligence
- AI for Scientific Discovery
- AI in Software Engineering

- AI for Social Good
- Green AI and Energy-Efficient Computing
- Quantum AI and Intelligent Computing

SUBMISSION PROCEDURE:

Researchers and practitioners are invited to submit papers for this special theme session on **“Trustworthy Artificial Intelligence and Intelligent Computing for Next-Generation Smart Systems”** *on or before* [insert due date]. All submissions must be original and may not be under review by another publication. INTERESTED AUTHORS SHOULD CONSULT THE CONFERENCE’S GUIDELINES FOR MANUSCRIPT SUBMISSIONS at https://comsia.in/paper_submission.html. All submitted papers will be reviewed on a double-blind, peer review basis.

NOTE: While submitting paper in this special session, please specify **“Trustworthy Artificial Intelligence and Intelligent Computing for Next-Generation Smart Systems”** at the top (above paper title) of the first page of your paper.
